

## FONDEX acquies a new SERVO PRESS machine

The installation of a new SEYI 200-tonne press, one of the latest generation of more energy efficient SERVO Press machines, enables FONDEX to develop new levels of performance and offer more technical parts in order to meet the demands of its customers as closely as possible

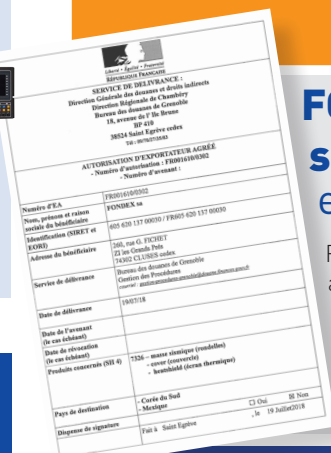

## FONDEX honoured at MIDEST and invited to the Élysée!

In March 2018, FONDEX attained a Global Industrie Award in the "Outstanding Achievement" category for one of its projects. FONDEX won this prize thanks to the increased performance of an automotive electronics system produced at the request of one of its component-maker customers. The panel of judges were won over by the creation of a machine specially designed to enable aluminium-on-aluminium welding, thereby lightening the finished product. The technical aspect was combined with a successful collaborative initiative, enabling various partners in the Arve Valley and customer teams located in Mexico, the USA and Europe to work together. FONDEX was invited and received at the Élysée by French President Emmanuel Macron and Minister of the Economy Bruno Le Maire.

## FONDEX facilitates its customer service by becoming an approved exporter (FR001610/0302)

FONDEX has acquired the status of approved exporter with the attribution of customs competency for countries holding trade agreements with the European Union. South Korea and Mexico will be the first destinations to enjoy exemption from customs duties. This status offers customers a real productivity gain, as well as simplifying the procedures to be followed.

## FONDEX obtains the new IATF 16949 certification

FONDEX attaches the greatest importance to development of the automotive standard ISO/TS 16949, which has now become IATF 16949. As a major sub-contractor, FONDEX wishes to guarantee compliance with the new standard to meet the quality requirements of its component-maker and automotive-manufacturer customers.

## Why is FONDEX taking part in the Micronora trade fair?

FONDEX will be present at the Micronora micro- and precision-technology trade fair, taking place in Besançon from 25 to 28 September 2018.

This will provide an opportunity for FONDEX to present its specific technical skills as part of its development strategy, particularly to technological sectors at the immediate periphery of microtechnology.

## Export : strong growth in the Mexican and American markets for FONDEX

FONDEX is strengthening its commercial relations with Mexico, Central America and the United States. The strong growth in trade with these American countries places them at the top of export markets.
