

## To train to always progress !

The mastery of technical know-how and its evolution is at the heart of FONDEX's strategy. We cultivate the skills of our teams to support the continuous improvement of our quality and the development of our business. The training offered to our employees includes :

- Programming EASY MACHININ
- Metrology MITUTOYO
- KEYENCE measurements
- DELTAMU software
- Adjustment of stamping presses
- Etc.

## FONDEX evolves and it's production monitoring too !

Since the beginning of the year 2022, we are in full adoption of the MES software (Manufacturing Execution System) QUASAR Solutions.

The progressive optimization of our production data aims at still improving the control of our industrial performances, in particular for the processes of quality controls and manufacturing follow-up.

For our company and for our customers, the benefits will be numerous :

- have more accurate production monitoring data and indicators,
- improve the follow-up of the production in real time,
- record and trace the quality controls performed by our production department,
- be more reactive.

The deployment of this MES solution is a long-term process, training and testing have begun in order to analyze all the data and parameters to succeed at each stage.

## Complete control of tooling !

Tooling is at the heart of FONDEX's know-how and of the efficient industrialization of your projects.

Our tooling department is equipped with perfectly mastered conventional and digital means and relies on an advanced expertise of each step: definition of the production range, design and realization of the tools, tests and optimization of the strip, implementation of the machine tools.

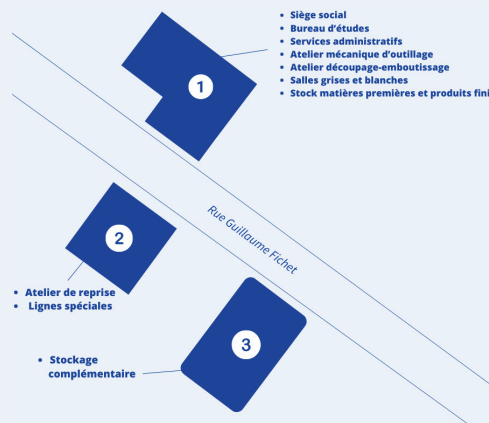

Read Laurent Congratel testimony, responsible for our tooling department, right here !

## Our 3 industrial sites

At Fondex, we have 3 industrial sites (6600 m2) located in France, in Cluses. They are equipped to study, industrialize, produce, control, store and deliver your series of parts and sub-assemblies in the best possible conditions.

This is where our team of 100 employees works on a daily basis on your various projects !

## Shows 2022

Close to its customers, FONDEX facilitates exchange with them by participating once again this year in Global Industrie and Micronora.

micronora

GLOBAL INDUSTRIE
