

## Quality at all levels!

As one of the first to be ISO certified in 1990, a quality approach has always been at the core of the development strategy in FONDEX.

- prototyping
- pre-production
- industrialisation
- series production
- modification of parts

Each stage is part of a demanding QSE approach that takes into account standards, changing needs, the need for responsiveness, and a total traceability for lasting customer satisfaction.

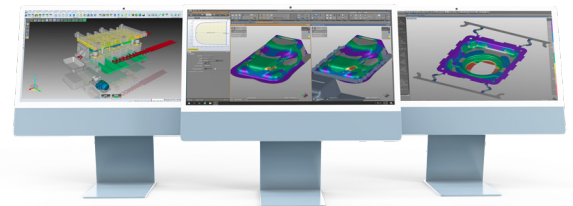

## A partner in your industrial projects

Are you looking for an industrial subcontracting partner who possesses all the required expertise and capabilities for the industrialisation and manufacturing of your parts and is committed to a high quality of service?

FONDEX masters the entire technical and production value chain for all types of cut or stamped parts:

- Special fixtures
- Complex inserts
- Technical covers
- Shielded mountings
- Heatshields
- etc.

## Focus on cutting and pressing

FONDEX is an expert in all the technologies of cutting and pressing to produce your simple or complex parts in all types of metals (coated steels, stainless steel, refractory stainless steel, aluminium, brass, copper, bronze, nickel) up to a thickness of 6mm, depth of 110mm, and length of 110mm.

- Co-design and simulation of cut or pressed components. (VISIPROGRESS, AUTOFORM...)
- Definition of specifications, value analysis.
- Feasibility and security studies.
- Research and optimisation of ranges.
- Tool manufacturing.
- Expertise of control operations, finishing, particle removal, assembly, packaging
- Process automation and robotisation

## Let's meet up!

In order to be close to its clients, FONDEX facilitates exchanges, notably by participating in industry trade shows.

7 to 10  
March 2023  
Lyon  
Stand 6M142

7 to 10  
November 2023  
Stuttgart

## A team of experts dedicated to your projects

The development of multidisciplinary technical skills, powerful machine capabilities, and a strong customer service culture is the recipe applied by FONDEX since its establishment to provide an industrial solution adapted to the requirements of each part.

Our employees are experienced professionals, regularly trained to adapt to new technologies and the most advanced working methods. Their expertise is a major asset for our company, which can add to your products an optimal quality.
